

ELECTRICAL DISTRIBUTION PANELS

We manufacture and supply wide ranges of Electrical Distribution Panels which are used in diverse industries, Residential and Commercial areas to connect and control Motors, Instruments and other loads. These panels are designed as per customer requirements using MCB, MCCB, VCB, OCB with all safety features like Over Current, Earth Faults and Transformer protection.

Features:

- Available up to 4000 Amp.
- Short Circuit capacity of 50 kA, 100kA, 300 MVA and 600 MVA.
- Usage of ACB, OCB, VCB, BOCB, MCCB, ELCB and MPCB.
- Built in DC Power Supplies & UPS System.
- Interface with SCADA System.
- Floor and Wall Mountable versions available.
- Indoor/Outdoor Installation as per customer requirement.
- Proper Ventilation System.
- Highly Fire Retardant.
